Operations Manager at Kar Global
robert.buhmann@traderev.com

I'm looking for a position to learn and apply my skills as I grow with an organization. With my experience at Vanderbilt/Trilogy Full Stack Developer bootcamp, I've acquired a broad understanding of Node.js, Javascript, HTML, and CSS, with the ability to create complex web applications. I've spent time working well with groups using github to commit, test, and review code with others. I've learned from self development books and programming books such Eloquent JavaScript by Marijn Haverbeke.

PROJECTS

- - https://chadtarpey615.github.io/Super-Heroes/

The subject of this project is wrapped around Marvel & DC superHeroes.Using three api calls to get stats, gifs, and movies onto the screen that is created dynamically with JQUERY

- - https://eatandplay.herokuapp.com/

Time Zone Traveler application that uses three api's. Map Box, Open cage, and Algolia api's. With GSAP animations for the intro loading of the home page . When selecting the add food location button it with take you to food form page. From there you fill out all the fields to input a new food location into MySql database using sequelize models.
